## CAREER OBJECTIVE

B.Tech Computer Science (AI & ML) student with strong knowledge of Python, Data Structures, and Machine Learning fundamentals. Passionate about developing efficient software and AI-driven solutions. Seeking a Software Developer / Python Developer / AI-ML Trainee role to apply analytical and problem-solving skills in real-world applications.

## TECHNICAL SKILLS

|                        |                                                                         |
|------------------------|-------------------------------------------------------------------------|
| Programming Languages: | Python, C, C++, JavaScript                                              |
| Web Technologies:      | HTML5, CSS3, JavaScript (ES6+)                                          |
| Databases:             | MySQL, SQLite (Basic)                                                   |
| Tools & Platforms:     | Git, GitHub, VS Code, Tableau, SCADA, PLC                               |
| Soft Skills:           | Problem-solving, Analytical Thinking, Team Collaboration, Quick Learner |

## EDUCATION

|                                                                  |                                           |
